
CONTENTS

Foreword	1
<i>Melvin Fitting</i>	
 Selected Topics from Contemporary Logics	
Towards Universal Logic: Gaggle Logics	5
<i>Guillaume Aucher</i>	
The Reasonable Effectiveness of Model Theory in Mathematics	75
<i>John Baldwin</i>	
Indeterminateness and ‘The’ Universe of Sets: Multiversism, Potentialism, and Pluralism	105
<i>Neil Barton</i>	
Modal Frame Incompleteness. An Account Through Second Order Logic	183
<i>Mircea Dumitru</i>	
Bilattice Basics	203
<i>Melvin Fitting</i>	
Morphisms and Duality for Polarities and Lattices with Operators . . .	247
<i>Robert Goldblatt</i>	

Reconceptualizing Rationality: The Growth of Meaning and the Limits of Formalism	301
<i>Susan Haack</i>	
Is Choice Self-Evident?	325
<i>Kai Hauser</i>	
Possibility Semantics	363
<i>Wesley Holliday</i>	
Fundamentals of Computability Logic	477
<i>Giorgi Japaridze</i>	
Tableau Metatheory for Syllogistic Logics	539
<i>Tomasz Jarmużek and Rajev Goré</i>	
Relative Necessity Extended	583
<i>Jessica Leech</i>	
Exploring Subset Models for Justification Logic	605
<i>Eveline Lehmann and Thomas Studer</i>	
Potentiality and Indeterminacy in Mathematics	635
<i>Øystein Linnebo and Stewart Shapiro</i>	
Extending Ideas of Tait for Incorporating Higher-Order Parameters in Schemes of Reflection	655
<i>Rupert McCallum</i>	
Classical Logic Through Refutation and Rejection	667
<i>Gabriele Pulcini and Achille Varzi</i>	
First-Degree Entailment and Binary Consequence Systems	693
<i>Yaroslav Shramko</i>	
Point-Free Theories of Space and Time	715
<i>Dimitar Vakarelov</i>	
Logic’s Naturalistic Character	795
<i>John Woods</i>
