## ARTICLES

<b>Introduction to “Hilbert’s epsilon and tau in Logic, Informatics and Linguistics”</b> . . . . .	<b>221</b>
<i>Stergios Chatzikyriakidis, Fabio Pasquali and Christian Retoré</i>	
<b>Barry Hartley Slater (1936–2016): A Logical Obituary</b> . . . . .	<b>223</b>
<i>Claus-Peter Wirth</i>	
<b>From Logical and Linguistic Generics to Hilbert’s tau and epsilon Quantifiers</b>	<b>231</b>
<i>Stergios Chatzikyriakidis, Fabio Pasquali and Christian Retoré</i>	
<b>Hilbert’s tau and epsilon in Proof Theoretical Foundations of Mathematics: An Introduction</b> . . . . .	<b>257</b>
<i>V. Michele Abrusci</i>	
$(\exists y)(y = \epsilon xFx)$ . . . . .	<b>275</b>
<i>Hartley Slater</i>	
<b>Buying Logical Principles with Ontological Coin: The Metaphysical Lessons of Adding epsilon to Intuitionistic Logic</b> . . . . .	<b>287</b>
<i>David DeVidi and Corey Mulvihill</i>	
<b>A Proof Theory for First-order Logic with Definiteness</b> . . . . .	<b>313</b>
<i>Nissim Francez and Bartosz Więckowski</i>	

<b>Two Types of Indefinites: Hilbert &amp; Russell</b> . . . . .	<b>333</b>
<i>Norbert Gratzl and Georg Schiemer</i>	
<b>On Equality of Contexts and Completeness of the Indexed epsilon-Calculus</b>	<b>349</b>
<i>Hans Leiß</i>	
<b>Noun Phrases in Japanese and epsilon-iota-tau Calculi</b> . . . . .	<b>369</b>
<i>Sumiyo Nishiguchi</i>	
<b>Hilbert's epsilon-operator in Doctrines</b> . . . . .	<b>383</b>
<i>Fabio Pasquali</i>	
<b>Epsilon Terms in Intuitionistic Sequent Calculus</b> . . . . .	<b>403</b>
<i>Giselle Reis and Bruno Woltzenlogel Paleo</i>	
<b>Studies of Hilbert's epsilon-operator in the USSR</b> . . . . .	<b>427</b>
<i>Sergei Soloviev</i>	
<b>A Simplified and Improved Free-variable Framework for Hilbert's epsilon as an Operator of Indefinite Committed Choice</b> . . . . .	<b>437</b>
<i>Claus-Peter Wirth</i>	
<b>The Explicit Definition of Quantifiers via Hilbert's epsilon is Confluent and Terminating</b> . . . . .	<b>529</b>
<i>Claus-Peter Wirth</i>
