The Many Sides of Logic
Studies in Logic, Volume 21
Walter Carnielli, Marcelo E. Coniglio, Itala M. Loffredo D`Ottaviano, editors

Section 1: Paraconsistent and Adaptive Logic

IFLogic Meets Paraconsistent Logic
Jaakko Hintikka 3

Modular Semantics for Some Basic Logics of Formal Inconsistency
Arnon Avron 15

Adaptive C_n Logics
Diderik Batens 27

An Adaptive Logic for Rational Closure
Christian Strasser 47

Section 2: Logic and Meaning 69

Sentence, Proposition, Judgment, Statement, and Fact: Speaking about the Written English used in Logic
John Corcoran 71

Truth Defined
David Miller 105

The Problem of Existential Import in First-order Consequential Logics
Claudio Pizzi 133

Section 3: Logic and Mathematics 151

Logic and Mathematics: Propositional Calculus with only Three Primitive Terms
E. G. K. López-Escobar 153

The Geometric Analogy and the Idea of Pure Logic
Luis Estrada-González 171

Analytic Structures and Model Theoretic Compactness
José Iovino 187

On Profinite Structures: Hugo Luiz Mariano and Francisco Miraglia 201

A Structural Perspective on Mathematics (and Mathematical Proofs)
Jairro José da Silva 225

Section 4: Logic, Proofs and Games 239

Goal-Directed Tableaux: Joke Meheus and Kristof De Clercq 241

Intuitionistic Sequent System with Multiple Succedent
María Fernanda Pallares 257

On the Proof Theory of $\mathcal{ALC}$
Alexandre Rademaker, Edward H. Haeusler and Luiz C. Pereira 273

Strategies. What's in a Name?
Dagmar Provijn 287

Diagrams, Visualization and Operational Constraints
Sérgio Schultz, 307

Quantifying in Extensive Games
Davi Romero de Vasconcelos and Edward Hermann Haeusler 321

Section 5: Logic and Its Algebraic Side **337**

A Duality for Three-valued Łukasiewicz Δ-implication Algebras
M. Abad, C. R. Cimadamore, J. P. Díaz Varela 339

On Some Operations Using the min Operator: Rodolfo Ertola 353

Algebraic Aspects of Quantum Indiscernibility
Décio Krause, Hércules de Araujo Feitosa 369

Section 6: Logic and the Question of Truth-Values **389**

Bivalent Sematnics for De Morgan Logic
(The Uselessness of Four-valuedness)
Jean-Yves Beziau 391

A Four-valued Logic for Reasoning about Finite and Infinite
Computation Errors in Programs
Beata Konikowska 403

Towards Fully Automated Axiom Extraction for Finite-valued Logics
João Marcos and Dalmo Mendonç 425

Section 7: Logic, Abductive and Defeasible Reasoning **441**

Prioritized Dynamic Retraction Function on Non-monotonic
Information Updates
Giuseppe Primiero 443

Conservative Contraction
Juliano S. A. Maranhão 465

The "Lottery Paradox" Paradox and other Self-attacking Arguments
from the Point of View of Defeasible Argumentation Frameworks
Gustavo A. Bodanza 481

Logic and Knowledge: Expectations via Induction and Abduction
Atocha Aliseda 497

Defining Inferential Contexts: Deduction and Abduction
Ángel Nepomuceno-Fernádez and Fernando Soler-Toscano 511

Section 8: Logic and Computing **531**

The Complexity of $AUTOSAT(\Sigma^{i}_{m})$
Flavio A. Ferrarotti and José M. Turull Torres 533

Inersection Type System with de Bruijn Indices
Daniel Lima-Ventura, Mauricio Ayala-Rincón, Fairouz Kamareddine 557
