Preface

The book that you are holding in your hands is a further entry in a series of volumes that aspires to make some of the ideas presented at the annual international symposium Logica permanently accessible to both the conference participants and the wider public.

The symposium, which took place at Hejnice Monastery in the Czech Republic from June 20 to June 24, 2016, brought together logicians from many different countries. This volume contains a representative sample of the contributions made at the conference. The Logica symposium is an event with a long tradition. Last year it could celebrate not only its thirtieth anniversary but also the fact that it has evolved into a respected conference which possesses a firm place in the annual schedule of the international community of logicians. The symposium is open to researchers of both a mathematical and a philosophical bent, which is reflected by the diversity of its audience. The informal atmosphere provides a space for a stimulating exchange of ideas among logicians of all generations, including students. As the editors of this volume we are proud that we can contribute to the successful completion of the annual symposium cycle by presenting this collection to you.

Last year's Logica was – as were all previous Logica symposia – organized by the Department of Logic of the Institute of Philosophy of the Czech Academy of Sciences. More than thirty lectures were presented during the conference, including those given by a distinguished list of invited speakers: Sara Negri, Kit Fine, Nicholas Smith, and Neil Tennant. As happens every year, the conference was enriched by a social programme that provided room for friendly debates concerning professional topics as well as for starting and developing personal friendships. The proceedings, which are traditionally published within one year of the conference, unfortunately offer only a limited record of the topics discussed and cannot hope to even partially convey its atmosphere. In spite of that, we hope that you will find this book worthy of your attention.

Both the Logica symposium and The Logica Yearbook are the result of a joint effort by many people to whom we would like to express our gratitude. We are, of course, very grateful to the Institute of Philosophy for all the important support that made the event possible. We express our thanks to the staff of Hejnice Monastery for their hospitality and friendly assistance. Special thanks from the organizers and also, we believe, from the guests go to the Bernard Family Brewery of Humpolec, which has traditionally spon-

sored the social programme of the symposium by providing three barrels of its excellent beer. We owe thanks to the Czech Science Foundation, which provided significant support for the meeting and for the publication of this volume with the funding of the grant project no. 13-21076S. We would like to express our gratitude to Olga Bažantová, who is a key member of the organizing crew. Our thanks also go to College Publications and its managing director, Jane Spurr, for their very pleasant cooperation during the preparation of this book. Last, but not least, we would like to thank all of the authors for their exemplary collaboration during the editorial process.

Contents

Determinate Truth in Fuzzy Plurivaluationism	1
<i>Libor Běhounek</i>	
Validity and Applicability of Leibniz’s Law of Substitution of Identicals	17
<i>Marie Duží and Pavel Materna</i>	
Making Sense of Higher-Level Plurals	37
<i>Berta Grimau</i>	
When Structural Principles Hold Merely Locally	53
<i>Ulf Hlobil</i>	
Four Remarks on Relations and Predication	69
<i>Haythem O. Ismail</i>	
Truthmaker Semantics: Fine Versus Martin-Löf	87
<i>Ansten Klev</i>	
Ignorance Without K(nowledge)	109
<i>Ekaterina Kubyshkina</i>	
Non-Normal Modal Logics: A Challenge to Proof Theory	125
<i>Sara Negri</i>	
Revisiting Dummett’s Proof-Theoretic Justification Procedures	141
<i>Harmógenes Oliveira</i>	
Double-Line Harmony in a Sequent Setting	157
<i>Norbert Gratzl and Eugenio Orlandelli</i>	
A Normal Paradox	173
<i>Mattia Petrolo and Paolo Pistone</i>	
The Definitional View of Atomic Systems in Proof-Theoretic Semantics	185
<i>Thomas Piecha and Peter Schroeder-Heister</i>	
Two Accounts of Pairs	201
<i>Martin Pleitz</i>	
A General Framework for Logics of Questions	223
<i>Vít Punčochář</i>	

Non-Classical PDL on the Cheap	239
<i>Igor Sedlár</i>	
LP, K3, and FDE as Substructural Logics	257
<i>Lionel Shapiro</i>	
Truth via Satisfaction?	273
<i>Nicholas J.J. Smith</i>	
Free Choice Permission in STIT	289
<i>Frederik Van De Putte</i>	
A Hierarchy of Logical Constants	305
<i>Alexandra Zinke</i>
