Contents

Preface	xiii
The Journey	xiv
Acknowledgments.....	xix
Chapter 1 An Introduction to Systems.....	1
Systems are Everywhere	1
The Systems Movement	2
Fundamental Properties	3
Discipline Independence	4
System Thinking and Systems Engineering	6
Classifying Systems	6
System Topologies.....	8
Multiple Viewpoints and Views	9
Do Systems Really Exist?.....	10
Systems-of-Interest	13
System Assets	15
Needs, Services and Effect.....	16
Decomposition	19
Typical System Assets	20
System Elements	21
Sustained, Situation/Respondent and Thematic Systems	22
System-of-Systems	25
Managing System Change	27
System Complexities.....	29
Categorizing Complexity.....	29
The Catastrophe Gap	31
Complexities in Enterprises	32
A Systems Survival Kit.....	35
Concrete Concept Definitions	35
Universal Mental Model.....	37
System Principles	37
Knowledge Verification	39

Chapter 2 Thinking in Terms of Systems	41
Systems Thinking.....	41
Hard and Soft Systems.....	44
Models and Modeling	45
Paradox.....	47
Describing System Situations	48
System Focus	48
Finding the Root Causes.....	49
Influence Diagrams	51
Links, Loops and Delays	52
Telling a Systems Story	54
System Archetypes	55
Rich Pictures.....	58
Systemigrams	60
Simulating System Dynamics	64
Soft Systems Methodology	66
Principles to Remember	70
Knowledge Verification	71
Interlude 1: Case Study in Crises Management	73
<i>Abstract</i>	73
Introduction	74
We Have a Situation... ..	74
What is an Special Response Unit?	74
Background	75
Los Angeles and the Birth of SWAT	75
Munich and the Shadows of Terror.....	77
Special Response Unit Cases of Interest	78
Ruby Ridge and Waco	78
Columbine.....	79
Analysis of Special Response Units as Systems.....	79
Classification and Topologies of SRU Systems	79
Special Response Units as Respondent Systems	81
Critical Factors in SRU System Adaptability.....	82
SRU System Problems and Solutions in the Cases of Interest	83
<i>Command and Control</i>	83
<i>Response Time</i>	85
<i>Escalation</i>	85
Conclusions	87
Case Study References	88

Interlude 2: Case Study in Organizational Development.....	89
<i>Abstract</i>	89
Introduction	90
A Decentralized Organization	90
Handelsbanken Today	91
A Rich Picture of the Company Culture	91
Some Implications of the “Rich Picture”	92
The Company Culture as a System	93
“Hjulet” (The wheel)	94
“Mål och Medel” (“Goals and Means”).....	94
A Systemigram of “Mål och Medel”	95
Implications of the Systemigram	96
Systems of Interest	96
Conclusions	97
Case Study References	97
Chapter 3 Acting in Terms of Systems	99
A Paradigm for Thinking and Acting	100
The OODA Loop	100
The PDCA Loop	101
OODA and PDCA Integration	102
Revisiting the Change Model	103
Systems Engineering	105
System Life Cycle Models and Processes	106
Life Cycle Models.....	106
Enabling Systems	108
Defining Stages	109
Processes for System Actors	111
<i>Organization Project-Enabling Processes</i>	112
<i>Agreement Processes</i>	113
<i>Project Processes</i>	113
<i>Technical Processes</i>	115
Distribution of Life Cycle Effort	116
An Example of Standard Utilization	118
Tailoring to Specific Needs	119
Another Look at the Change Model	120
Knowledge Verification	122

Chapter 4 System Descriptions and Instances 123

Life Cycle Transformations	124
Key System Success Factors	125
Driving Concepts and Principles	125
Role of Architecture	128
Role of Processes	129
Important Aspects of the Life Cycle	129
A Collection of Situation-Respondent Systems	130
Project Scope	132
From Requirements to Architecture	132
Baselines and Configurations.....	134
Produced Instances	134
Operational Parameters	135
Architecture Description.....	136
Architecture Frameworks	138
A Light-Weight Architecture Framework.....	139
Ownership of System Descriptions and Instances.....	143
Trading in System Products and Services	143
Supply Chain Relationships	144
Knowledge Verification	147

Interlude 3: Case Study in Architectural Concepts and Principles..... 149

Introduction	149
Automatic Train Control in Sweden	150
The Track to Train Transmission System	151
The On-Board System	152
Ownership of the System Products	153
Evolution of the Architectural Concepts	153
ATC Software Statistics.....	155
Life Cycle Implications.....	157
Development and Maintenance Principles.....	158
Lessons Learned	159
Acknowledgements	160
Case Study References	161

Chapter 5 Change Management..... 163

Organizational Cybernetics	164
Change Management as a Cybernetic System.....	166
Measuring Effect	167
Measure of Effectiveness (MOE)	167
Measure of Performance (MOP)	167
Customer Satisfaction Index (CSI)	168
Process Assessment	169
Balanced Scorecards	169
Situation Coverage.....	171
Decision Making	172
Change Triggers - Reactive and Proactive Decisions	172
Strengths, Weaknesses, Opportunities and Threats	173
Decision Trees	175
Consistent Decision Making.....	177
The Entropy Phenomenon	177
Implementation of Change Management.....	179
Change Management Processes.....	179
Ownership of Change Management.....	181
Distributed Change Management	182
Instruments for Life Cycle Management.....	183
Management of Processes and Life Cycles	185
Change Model for Rapid Decision Making	186
Sensemaking	187
Deploying System Assets	189
Knowledge Verification	190

Chapter 6 Life Cycle Management of Systems..... 193

Management and Leadership of Systems.....	193
System Lifetimes	195
Type of Value Added Products/Services.....	196
Missions, Projects and Programs	197
System-of-Systems and their Ownership.....	198
Life Cycle Models Revisited	199
The T-Model	199
Stage Execution Order	201
Allocating and Meeting Requirements	204
Implementation of System Elements.....	205
Portraying Additional Aspects of Life Cycle Models	205
The Vee Model	205
The Spiral Model	207

Life Cycle Roles and Responsibilities	208
Integrating Life Cycle Models and Processes	210
Managing Life Cycle Models	210
Process Management	210
Life Cycle Model Instances	211
Provision of Specific Detail, Methods and Tools	212
Product Life Cycles	213
Knowledge Verification	216
Chapter 7 Data, Information and Knowledge	219
From Data to Wisdom	220
A Broader View of Information	221
Data and Information Management	221
Classifying Information	223
Taxonomies and Ontologies	224
Gathering Data, Information and Knowledge	225
Building Information Models	226
Creative Thinking.....	228
Synectics.....	229
Concept Maps.....	230
The Learning Organization	231
Personal Mastery	231
Mental Models	232
Shared Vision.....	232
Team Learning	233
Systems Thinking	234
Building a Learning Organization	234
Knowledge Verification	236
Interlude 4: Case Study in Ontology Life Cycle	
Management	237
<i>Abstract</i>	237
Introduction	238
ISO/IEC 15288 System Life Cycle Processes	238
Ontologies as Systems	239

Ontology Development	240
Methodologies for Ontology Development	241
Ontology Reuse	242
Ontology Evaluation	242
Ontology Maintenance	242
Using ISO/IEC 15288 for Ontology Development and Deployment	243
EXAMPLE: Development and Deployment of an Ontology for Oral Medicine	246
Discussion	248
Case Study References	249

Chapter 8 Organizations and Enterprises as Systems.....251

Organizational System(s)-of-Interest.....	251
Kaleidoscope View	253
Managers as System Owners	253
Distribution of Authorities and Responsibilities	254
Organizations in their Environments.....	256
Enterprise Architectures	257
Applying the Light-Weight Architecture Framework	258
Leading Organizational Change	259
Process of Strategic Changes	260
Omnipresence of Cybernetics	262
Transforming Organizations.....	262
Counteracting the Entropy Effect	263
Achieving Quality in Organizations, Enterprises and Projects	265
Implementation of Management System Standards.....	266
Deploying Quality and/or Environment Management Systems	269
Supporting Project Needs.....	271
Knowledge Verification	272
Summing It All Up!!!.....	273
References	275
About the Author	282
