### ARTICLES

|  |           |
|--|-----------|
| <b>Introduction . . . . .</b>  | <b>1</b>  |
| <i>Fairouz Kamareddine</i>   |           |
| <b>Combining Computation and Deduction . . . . .</b>   | <b>9</b>  |
| <i>Henk Barendregt</i>   |           |
| <b>On the Characterization of Inconsistency Proofs in<br/>Illative Combinatory Logic . . . . .</b> | <b>27</b> |
| <i>Martin Bunder</i>   |           |
| <b>Intersection and Union Types as Logical Formulae . . . . .</b>                                  | <b>35</b> |
| <i>Mariangiola Dezani and Betti Veneri</i>   |           |
| <b>Around Curry's Thesis . . . . .</b>   | <b>57</b> |
| <i>Roger Hindley</i>   |           |
| <b>From <math>\lambda</math>-calculus to Category Theory through Algebraic Rewriting</b>           | <b>65</b> |
| <i>Gérard Huet</i>   |           |
| <b>Initiation à la théorie des catégories . . . . .</b>  | <b>69</b> |
| <i>Gérard Huet</i>   |           |

|   |     |
|---|-----|
| Canonical Basis of Commuting Diagrams: Application to the<br>Mechanical Synthesis of Coherence Conditions . . . . . | 139 |
| <i>Gérard Huet</i>  |     |
| Substitution in the $\lambda$ -calculus and the role of the Curry School  | 145 |
| <i>Fairouz Kamareddine</i>  |     |
| A Tale of Two Jewels . . . . .  | 179 |
| <i>Jan Willem Klop</i>  |     |
| Recursion Does Not Always Help . . . . .  | 265 |
| <i>Gordon Plotkin</i>   |     |
