Preface

This volume documents the 6th European Congress of Analytic Philosophy, held in Krakow, 21–26 August 2008; the Congress was organized by the European Society of Analytic Philosophy. The book contains the plenary talks, invited lectures (unfortunately, not all these speakers submitted their papers), as well as selected contributions delivered during the course of special workshops. Previous European Congresses have not culminated in the publication of proceedings. We therefore hope the work at hand will install a new tradition with regards to the meetings of European analytic philosophers. Here we would like to express our gratitude to Dov Gabbay for taking these proceedings under the wing of College Publications, and to Jane Spurr for her assistance.

Jan Woleński
